

If this rackspace (3) properties is set to ***midi patch persist*** and you switch from 3 to 2 in this case WHILE you are holding a note on the guitar (coming from Rackspace 3)you will sound both patches , in essence having both patches on

If this rackspace (3) properties is set to ***midi patch persist*** and you switch from 3 to 2 in this case while NOT sustaining a note on the guitar (coming from Rackspace 3)you will switch logically into patch 2 with the preset mute input and output Rack properties sounds fading in and out as expected

Rackspace with Jam Origin MG3 sending midi to Kontakt
